

GETON CONTAINERS

10MW Photovoltaic Energy Storage Container for Railway Stations

Overview

Are photovoltaic and energy storage systems integrated into AC railway traction power supply systems?

This study delves into the integration of photovoltaic (PV) and energy storage systems (ESS) into AC railway traction power supply systems (TPSS) with Direct Feed (DF) and Autotransformer (AT) configurations. The aim is to evaluate energy performance, overhead line current distribution, and conductor temperature.

How many MWh does a railway PV system generate?

For railway PV systems, the total generation on the day was 12,051 MWh, which is approximately 24 times higher than the consumption. The PV system provided power to the railway system from 5 a.m. to 7 p.m. The railway PV systems were able to cover BS-HSR's electricity demand before 6 p.m.

How BS-HSR's electricity demand was covered by the railway PV system?

The PV system provided power to the railway system from 5 a.m. to 7 p.m. The railway PV systems were able to cover BS-HSR's electricity demand before 6 p.m. The local railway PV generation satisfied 93.4% of the electricity demand in Jiangsu without the assistance of energy storage devices.

Can railway PV supply power to the HSR?

The lowest daily PV generation is 1334 MWh, which still covers 60% of the electricity consumption. These results indicate the high potential of the railway PV system to supply power to the HSR and show that the railway system is not highly reliant on the storage system, which undoubtedly cuts the system costs.

10MW Photovoltaic Energy Storage Container for Railway Stations

Mobile Solar Container Systems , Foldable PV Panels , LZY Container

LZY Mobile Solar Container System with 20-200kWp foldable PV panels and 100-500kWh battery storage, deployable in under 3 hours.
