

15MWh Solar Container for Livestock Farming in Jerusalem

Overview

Is solar energy cost-competitive in Israel?

In Israel, solar technology has progressed so much that it is nearly cost-competitive with fossil fuels. The Negev Desert's high yearly solar incidence has fostered an internationally recognized solar research and development industry.

What is the goal of the Ashalim solar station?

Its goal is to generate 10 percent of Israel's energy by 2020 from clean resources. The Ashalim solar station is located in Israel's Negev desert, close to the Ashalim kibbutz. It is divided into 3 plots, each with different technology. The station uses three different types of energy: photovoltaic, solar thermal, and natural gas.

Where is the largest photovoltaic power plant in Israel?

the largest photovoltaic power plant in Israel was built in December 2014 at Ramat Hovav, over a risky dumpsite.

Where is the first solar field in Israel?

The first commercial solar field of Israel is located in Ketura Sun. Arava Power Company built it on Kibbutz Ketura in early 2011. Ketura Sun is a 20-acre (8.09-hectare) solar farm that will generate 4.95 megawatts of green energy.
