

395w solar module price

Overview

What is a Canadian Solar 395w solar panel?

Canadian Solar 395W Solar Panel is an all-black PERC module with an efficiency up to 19.6%. This solar panel is an ideal solution for residential rooftop installations or commercial systems. Canadian Solar HiDM5 modules have a higher than average efficiency of 19.6%, which is achieved due to improved cell construction and innovative panel design.

What is the cost of a 395 watt solar panel?

The average cost of a 395 watt solar panel, such as American or Hanwha Q Cell models, is around \$230. These panels typically have 144 half-cut solar cells and dimensions of about 79" X 39" X 1.4\.

How much does a JA Solar 395w solar panel cost?

The JA Solar 395w Solar Panel costs \$309.36. It is a monocrystalline panel with 108 cells and a rated power output of 395 W, voltage (VOC) of 36.98 V.

What is Trina tallmax 395w?

Trina Tallmax 395W is a 144 half-cut monocrystalline cells module with maximum power efficiency of up to 19.4%. This solar panel is highly reliable due to stringent quality at control at the point of manufacturing. Trina solar panels distributed to over 60 countries all over the world.
