## **40kw string inverter**

## Overview

---

What is a 40kW inverter for off-grid use?

The 40kW inverter for off-grid use features high-quality pure sine wave AC output and a 3 phase 4 wire connection. It has a no battery design, a wide DC input voltage range, an LCD display, and converts DC power to AC power in solar power systems.

What is a 3 phase string inverter?

The Three-phase string inverters are designed for commercial and power plant PV system applications, rating from 30kW to 60kW. All models with aluminum housings which are anodized, increasing durability and effectively preventing corrosion.

What are the advantages of a 40kW solar inverter?

IP65 protection level, fan cooling method, has a full range scheme of power protection. 40kW high power three phase solar grid tie inverter with wide voltage range to adapt to the needs of different occasions, lower starting voltage and higher conversion efficiency up to 98%, more stable and reliable for your solar on grid PV system.

What is the maximum input voltage for a 40kW inverter?

The inverter has a maximum input current, such as 40A for 40kW. Only when the input voltage exceeds 550V, the output is likely to reach 40kW. When the input voltage exceeds 800V, the heat generated by the loss increases sharply, causing the inverter to derate the output.
