

GETON CONTAINERS

Airport photovoltaic container three-phase discount

Overview

Can a mobile energy container be used to charge electric vehicles?

An innovative system for sustainable energy generation is currently in use at Munich Airport: a container with photovoltaic panels and wind rotors from FlowGen, a company specializing in green energy system solutions. In cooperation with Munich Airport, the mobile energy container is being used to charge electric vehicles.

What is a photovoltaic system?

power generation. Photovoltaic systems are sometimes also referred to as solar cells. When several solar cells are e.

How many photovoltaic panels will be installed at Vienna airport?

,000 photovoltaic panels this plant will be Austria's largest ground-mounted plant. After commissioning in spring 2022, the photovoltaic plants at the Vienna Airport site will generate an output of around 30 million kilowatt hours of solar power per year, and thus will cover around 30 per cent of Vienna Airport.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.
