

# **All in one solar power system in Philippines**

## Overview

---

How much do solar panels cost in the Philippines?

The cost of solar panels in the Philippines varies based on property type and other factors. For commercial properties, prices typically range from ₱20,000 to ₱30,000 per kilowatt, while residential installations usually cost between ₱30,000 and ₱50,000 per kilowatt.

Who is gosolar Philippines?

GoSolar Philippines, once a major solar product distributor in 2018, is now a leading solar energy provider with over 6 years of industry experience. Specializing in high-quality solar projects for residential, commercial, and industrial sectors, they've successfully installed 6+ Mega Watts of solar power across Luzon, Visayas, and Mindanao.

How many solar panels have been installed in the Philippines?

At present, SolarNRG Philippines has completed more than 30MWp installed grid-tied solar systems for residential developments, commercial clients, and industrial clients or developers. To put things into perspective, this is more than 75,000 panels installed and 125,000 MWh saved!.

Are solar panels a good investment in the Philippines?

Yes, investing in solar panels is a good idea in the Philippines. With the right system, our clients experience 30% to 70% savings on their electricity bills, with some even reaching a zero bill. The payback period for a solar system in the Philippines is typically between 3 to 5 years, after which the savings go straight to your pocket.
