

BESS solar panels on the roof of the Malabo factory

Overview

Can solar panels be installed on a factory roof?

The roofs of factories are often the ideal place to install solar panels. As factories are energy-intensive buildings, installing a solar PV system on the roof of a factory ensures free power can be generated to run everything underneath it.

Should a business use a solar system for a factory?

By moving towards a solar system for factory, you open your business up for the various tax benefits the government provides. It is a significant yet unfamiliar advantage of using solar systems for commercial purposes. For instance, in normal circumstances, you receive only a 5% depreciation against the cost of your asset.

Can solar PV be installed on warehouse roofs?

Installing solar PV on warehouse roofs means generating free electricity for the warehouse and adjacent buildings, such as offices. Warehouse and logistics firms can significantly reduce their energy bills with a solar PV system.

Why should a factory install a solar system?

Electricity expenditure is a source of major concern for every commercial establishment. Power costs depend on the factory's size and usage of grid electricity. However, by installing a solar system for factory, you not only bring down your energy costs but become an energy producer as well. Solar modules reduce electricity bills substantially.
