

British cylindrical solar container lithium battery

Overview

What is a cylindrical lithium ion battery?

Cylindrical lithium-ion battery cells are a type of rechargeable battery commonly used in a wide range of electronic devices, electric vehicles, and energy storage systems. They are characterized by their cylindrical shape, standardized sizes, and high energy density, making them versatile and suitable for various applications.

What are containerised solutions for lithium-ion systems?

We specialise in containerised solutions for lithium-ion systems – supporting everything from EV (electrical vehicle) infrastructure to renewable energy and industrial power. Built for high-risk environments, our enclosures go beyond standard builds.

Why do you need a battery enclosure?

As demand for high-capacity energy storage grows, so does the need for safe, compliant, and intelligently designed battery enclosures. We specialise in containerised solutions for lithium-ion systems – supporting everything from EV (electrical vehicle) infrastructure to renewable energy and industrial power.

What are the naming rules for lithium ion batteries?

The naming rules for cylindrical lithium-ion battery cells follows a standardized format based on the cell's dimensions, and usually represented by a five-digit code, where each digit provides specific information about the cell's dimensions. Here's a breakdown of the representation: What does 18650 means?
