

Central Asia Glass solar Power Plant

Overview

What is China-Central Asia Energy Cooperation?

China-Central Asia energy cooperation now spans beyond energy security to support broader sustainable development and a low-carbon future. Emerging areas of collaboration now include energy conservation, environmental protection, green agriculture, and clean and renewable energy.

How will China respond to a growing demand for solar glass?

To do this, China is rapidly ramping up wind and solar farms, among other things. From 2021 to 2030, the government plans to add 80 to 160 gigawatts of solar capacity annually. This implies a sharp increase in demand for solar glass, and the glass manufacturer will have to respond to it.

How much will China invest in a solar PV glass project?

PVTIME – On 13 November 2023, Flat Glass Group Co., Ltd. (601865.SH, 06865.HK), a leading Chinese solar PV glass manufacturer, announced that it will invest a total of approximately US\$290 million to build two photovoltaic module cover glass production projects with a melting capacity of 1,600 tonnes per day in Jawa Tengah, Indonesia.

Why is Indonesia launching a new PV glass project?

The projects, which are designed to meet the growing demand for PV glass in the overseas market, will be launched by Indonesia Flat Photovoltaic Co., Ltd, a wholly owned subsidiary of Flat Glass Group. The new investment is expected to expand its PV glass production capacity, especially in Indonesia, to reduce costs.
