

Central Europe Rooftop Solar System

Overview

How many GW CAN a European rooftop solar system generate?

According to SolarPower Europe, this standard could drive the installation of 150 to 200 gigawatts (GW) of additional rooftop solar between 2026 and 2030. This standard is designed to harness the substantial potential of EU rooftops, estimated at 560 GW by the EU Joint Research Centre.

Are EU member states facilitating rooftop solar deployment?

The report examines EU Member States (Bulgaria, France, Germany, Greece, Italy, Latvia, Lithuania, Portugal, Romania, Spain and Sweden) on their good and bad practices when it comes to facilitating rooftop solar deployment in the EU.

What is the EU solar rooftop standard (EPBD)?

(pveurope By HCN) The newly enacted EU Solar Rooftop Standard, part of the Energy Performance of Buildings Directive (EPBD), is set to dramatically expand rooftop solar capacity across Europe. According to SolarPower Europe, this standard could drive the installation of 150 to 200 gigawatts (GW) of additional rooftop solar between 2026 and 2030.

What is the rooftop solar PV comparison update?

The Rooftop Solar PV Comparison Update produced by CAN Europe and eco-union, with contributions from our members, is an updated version of the Rooftop Solar PV Comparison Report published by CAN Europe in May 2022.
