

# **Centralized solar and energy storage power station in New York USA**

## Overview

---

What is New York State's largest onsite solar generating and storage system?

New York, April 23, 2024 – TotalEnergies has begun construction of New York State's largest onsite solar generating and storage system at John F. Kennedy (JFK) International Airport in partnership with the Port Authority of New York and New Jersey (PANYNJ) and the New York Power Authority (NYPA).

How is NYS ensuring the safety and security of energy storage projects?

How NYS is ensuring the safety and security of current and future energy storage projects. NYSERDA offers objective information and analysis, innovative programs, technical expertise, and support to help New Yorkers increase energy efficiency, save money, use renewable energy, and reduce reliance on fossil fuels.

What is energy storage in New York?

Affordable and dependable energy for all New Yorkers. Energy storage is a smart and reliable technology that helps modernize New York's electric grid, helping to make the grid more flexible, efficient, and resilient.

How do energy storage systems work?

Energy storage systems, like large-scale batteries, are charged by electricity drawn from the power grid during periods of low demand or extra capacity, provided they are not directly connected to their own dedicated energy source. That electricity is stored and held until it's needed, such as during peak usage times, grid disturbances, or outages.
