

China distribution switchgear in Denmark

Overview

What is air insulated switchgear?

Air insulated switchgear (AIS) is an auxiliary distribution unit used to disperse the electrical energy of the main transmission unit fed by a large distribution transformer. adopts the air as the insulation media designed voltage ranging from 11KV to 36KV medium voltage power distribution system.

What is a switchgear used for?

It includes in one unit two switches that can connect the load to either or both main conductors, and a fusible switch or circuit breaker and switch that feed a distribution transformer. This type of switchgear is used for medium-voltage power distribution, from 7.2kV to about 36kV volts.

What is low voltage switchgear?

Low voltage switchgear is rated up to 1KV and consists of low voltage switches, earth leakage circuit breakers, HRC fuses, electrical isolators, Air circuit breakers (ACB), Molded case circuit breakers (MCCB) and miniature circuit breakers (MCB).

What is LV switchgear?

LV (Low voltage) switchgear is an engineered solution used to control, protect, and isolate electrical equipment or systems to allow work to be done and clear faults quickly and safely when required.

China distribution switchgear in Denmark

Distribution Switchgear

The Distribution Switchgear is a standout piece in our Switchgear collection. Finding a trustworthy supplier for Switchgear in China involves thorough research, validation of certifications, and ...
