

# China solar power to battery in New-Zealand

## Overview

---

What types of batteries are used in New Zealand?

The most common forms in use in New Zealand are electric vehicle batteries and stationary batteries integrated with rooftop solar installations. 2.17. Consumers with small-scale BESSs have the opportunity to be active participants in the power system.

Does New Zealand have a power system?

New Zealand's power system is undergoing a rapid transformation as the country's economy electrifies. While this creates opportunities, this also brings challenges for power system operation and for electricity reliability, including security of supply. 2.2.

Can New Zealand benefit from China's 'green value chains'?

The report says New Zealand can benefit from China's role in 'green value chains', with several key green energy technologies – such as photovoltaics, used for solar panels, and rechargeable batteries – produced in the country.

Can Chinese green tech suppliers enter New Zealand?

Barriers for Chinese green tech suppliers to enter New Zealand included shortage of qualified installers for advanced products, and ground transport logistics to project sites. New Zealand's world-renowned geothermal energy expertise could be helpful to China, when the time comes to exploit that renewable resource.
