# **Colombia Dedicated Solar System**

## Overview

---

Is solar energy a problem in Colombia?

Taking into account that Colombia is mostly a desert area, what was presented above confirms the deficit of photovoltaic development in the ZNIs, that underutilize the solar resource and the great territorial extension. 4. Future picture of the solar energy.

What is the solar energy potential in Colombia?

The potential of solar energy at a global level in Colombia is 4.5 kW h/m<sup>2</sup> /day and the area with an optimal solar resource is the Península de la Guajira, with 6 kW h/m<sup>2</sup> /day of radiation, surpassing the world average of 3.9 kW h/m<sup>2</sup> /day. In the referenced link , there is an interactive map of the radiation indices in Colombia by IDEAM.

Why are photovoltaic systems important in Colombia?

The implementation of photovoltaic systems in Colombia has enabled 2% of the population in areas that do not have access to electric energy to meet their lighting, refrigeration and leisure needs, allowing them to expand their capacities and improve their quality of life. The systems that have been installed are mainly focused on the rural sector.

Is Colombia a sustainable country?

Colombia, which belongs to the continent of America and is located in South America on the equatorial axis, has started to actively integrate itself into the field of energy sustainability and has penetrated the renewable energy matrix, allowing its commitment to reduce the economic dependence on fossil fuels and greenhouse gas emissions (GHG).

## Colombia Dedicated Solar System

### [Colombia invests \\$2.1 billion to install solar power systems ...](#)

Colombia has approved COP 8.35 trillion (\$2.1 billion) for its Colombia Solar program to equip 1.3 million low-income households with PV systems between 2026 and 2030.
