# Communication Which 5G base stations have the most

## Overview

---

How many 5G base stations does China Mobile have?

At the end of 2022, China Mobile had 1.3 million 5G base stations, 805,000 of which were mid-band, with plans to add another 360,000 base stations by the end of 2023. In short, CMCC is the most important buyer of base station equipment in the world.

Who is the most important buyer of 5G base station equipment?

In short, CMCC is the most important buyer of base station equipment in the world. It is therefore highly significant that in its latest round of tenders for 5G base station equipment in the 2.6 GHz frequency range, China Mobile decided to award 16.33% of the order volume to Ericsson (Sweden) and 10.28% to Nokia (Finland).

How many 5G base stations are there in the United States?

While China leads in sheer numbers, the U.S. is making steady progress. By late 2023, the country had between 150,000 and 200,000 active 5G base stations. The deployment strategy in the U.S. is different from China's, as it relies on private investment rather than government-led initiatives. Is this article too long?

How many 5G base stations will China have in 2023?

In April 2023 China's Ministry of Industry and Information Technology (MIIT) announced that Chinese operators now serve over 620 million subscribers from "over 2.64 million base stations. (and) China plans to add around 600,000 (additional) 5G base stations this year (2023) to increase .to 2.9 million by the end of 2023."
