

Current Status of 5G Base Stations in Denmark

Overview

Does Denmark have 5G?

Denmark's mobile broadband infrastructure is equally robust, with comprehensive 4G LTE coverage and rapidly expanding 5G networks. By mid-2023, basic 5G signal was available to virtually 100% of the population, meaning even remote communities fall within 5G coverage.

What is the European 5G Observatory?

The European 5G Observatory tracks progress in 5G infrastructure deployment across the EU and other regions worldwide according to base stations deployment, edge nodes and infrastructure sharing agreements. Source: IDATE estimates and regulators' data. Reporting period: at December 2024. Source: IDATE estimates and regulators' data.

Why do Danes use 5G?

Even on the mobile side, many Danes use 5G smartphones or wireless broadband modems as a complement or backup to their wired service. With widespread Wi-Fi and affordable data plans, Danes enjoy ubiquitous internet access both inside and outside the home. Businesses in Denmark likewise benefit from excellent connectivity.

When did 4G start in Denmark?

It was among the first to adopt GSM in the 1990s, and by the 2000s had multiple competing mobile operators (Telia entered the market in 1995, and "3" launched 3G in the early 2000s). 4G LTE was launched around 2010, with Denmark again in the first wave of European 4G deployments.
