Design of solar container energy storage system for base station in Mumbai India

Overview

Why is battery energy storage a key part of India's strategy?

A key part of our strategy is advancing battery energy storage system (BESS) integration into upcoming solar and hybrid projects. As India moves toward its 500 GW non fossil fuel based targets, enhancing dispatchability and grid stability will be critical.

Can solar-plus-storage transform India's energy landscape?

As a long-term renewable energy partner in India, we recognize the immense potential of solar-plus-storage in transforming the country's energy landscape. We are actively exploring co-located solar and storage as well as standalone BESS projects to support energy security, grid reliability, and sustainable economic growth.

Should solar storage be scaled up in India?

Scaling up solar storage projects in India presents both opportunities and challenges. While the potential for integrating battery storage with solar energy is immense, widespread adoption is still constrained by factors such as high capital costs, evolving regulations, and grid integration complexities.

How to scale solar-plus- storage in India?

Collaboration is key to scaling solar-plus- storage in India. We recognize that a multi- stakeholder approach, involving government agencies, utilities, private off takers, and financial institutions, is essential to driving the adoption of energy storage.
