

Double-glass solar modules in Lyon France

Overview

Are PV glass modules a good solution for energy efficient buildings?

These PV glass modules are not only a great and lightweight construction solution for energy efficient buildings. It provides glazing design options and endless possibilities for BIPV designers and architects to implement one of a kind exterior solutions.

What is a glass glass solar module?

Glass glass solar module is a long lasting and ultra resistant to any weather conditions Building Integrated Photovoltaics solution. BIPV solar panels can be used as an additional power source and alternative material in architecture to achieve future design for a comparable to standard materials price.

What is a PV glass module?

This technology so far has the highest durability rate against harsh environmental conditions and longer lifespan compared to other building integrated photovoltaics solutions in the market. These PV glass modules are not only a great and lightweight construction solution for energy efficient buildings.

Why should you choose metsolar glass / glass modules?

Metsolar manufacture glass / glass modules for those, who are looking for high performance, durable products with long lifespan. Wide range of customization options will allow architects and urban furniture design companies to reach the ideal advantages ratio between aesthetics, efficiency, cost and overall performance.
