

# **Dublin solar container communication station flywheel energy storage construction land**

## Overview

---

What was the first grid connected hybrid powered flywheel plant in Ireland?

The project involved developing and establishing the first grid connected Hybrid Powered Flywheel plant in Ireland. The plant comprised grid connected hybrid powered flywheels and battery technology. The fast responding plant was designed to allow energy to be transferred from the electricity grid system during period of low demand.

Does ESB have a battery plant in Dublin?

ESB has officially opened a major battery plant at its Poolbeg site in Dublin, which will store excess renewable energy for discharge when needed. It said the facility will add 75MW of fast-acting energy storage to help provide grid stability.

What is flywheel energy storage?

Flywheel energy storage is mostly used in hybrid systems that complement solar and wind energy by enhancing their stability and balancing the grid frequency because of their quicker response times or with high-energy density storage solutions like Li-ion batteries .

Where is the world's largest flywheel now?

A real heavyweight in the energy transition is on its way to Ireland. On 14 April the world's largest flywheel left the Siemens Energy factory in Muelheim, Germany, and is now on its way to the Moneypoint power station located in Southwest Ireland. A real heavyweight in the energy transition is on its way to Ireland.
