

Electricity generated by solar panels on rooftops in Algeria

Overview

Does Algeria have solar power?

Thanks to vast desert areas and long sunshine hours, Algeria boasts considerable solar potential. That explains why the country predominantly aims to improve its solar photovoltaic infrastructure to drive the clean energy transition rather than focusing on hydro and wind power plants.

Where are solar panels made in Algeria?

Alongside Zergoun, the manufacturer Laguna Solaire has 200 MW of annual capacity for solar panel production in Algeria. The production plant of Algerian telecommunications and renewable energy company Milltech has a facility in Mila, in the east of the country, with a production capacity of 100 MW for M3-based modules. Manufacturing hub.

When will a 300 MW solar power plant be built in Algeria?

The state-owned China State Construction Engineering Corporation (CSCEC) began building a 300 MW solar power plant in Algeria's Oued Province in March 2024 as part of the Solar 1,000 MW program. The project is slated for completion by late 2025 or early 2026.

How much energy does Algeria produce a year?

The country has an average of 3,000 hours of sunshine per year and global horizontal irradiation of almost 1,700 kWh/m²/year in the north and 2,263 kWh/m²/year in the south. Nevertheless, nearly 100% electrified Algeria generates 99% of its energy from domestic gas.
