

# Energy storage batteries in London

## Overview

---

Could battery storage save the UK energy system?

The UK government estimates technologies like battery storage systems – supporting the integration of more low-carbon power, heat and transport technologies – could save the UK energy system up to £40 billion by 2050, ultimately reducing people's energy bills.

What is the future of battery storage in the UK?

Overall, battery storage in the UK is seeing sustained growth and shows a promising future. Over 70GWh of approved projects are due to be connected to just the transmission network by the end of 2030, well over the Clean Power 2030 goal.

How many MW of battery storage are there in the UK?

Our cities and daily lives consume electricity and without the essential supply from the national grid, widespread havoc would ensue. At the end of 2019 there was approx. 900 MW of connected battery storage in the UK.

How many battery storage projects are there?

The pipeline of battery storage projects has continued to grow steadily again, from 84.4GW in December 2023 to 95.5GW in May 2024. This edition of the EnergyPulse report on Energy Storage shows there is 8.7GW of batteries in operation and under construction and more than 30GW projects have now been consented.
