

Ethiopia Energy Storage Power Plant

Overview

Is Ethiopia planning a solar power plant near Addis Ababa?

Ethiopia's state-owned electric power company is planning to develop a 100 MW Solar PV power plant near the town of Metahara, 200 km east of the capital Addis Ababa. The project is supported by Power Africa, a U.S. Government-led partnership to promote new generation and increase access to electricity in Africa.

Are there power stations in Ethiopia?

This page lists power stations in Ethiopia, both integrated with the national power grid but also isolated ones. Due to the quickly developing demand for electricity in Ethiopia, operational power plants are listed as well as those under construction and also proposed ones likely to be built within a number of years.

What are renewable sources for thermal power plants in Ethiopia?

Renewable sources for thermal power plants include agricultural wastes, wood, urban wastes. In short: biomass. Two types of these thermal power plants exist in Ethiopia: Simple biomass thermal power plants, all electricity generated is exported to the power grid.

Is there a biomass power plant in Ethiopia?

There is only one biomass-based thermal power plant in Ethiopia which is not attached to some large factory (therefore it is "simple" and not "cogenerational"). Located at the site of the main landfill (Koshe) of the capital Addis Ababa is the first waste-to-energy power plant of Ethiopia, Reppie waste-to-energy plant.
