

# **Financing for a 120kW photovoltaic container in Maseru**

## Overview

---

How much does a solar system cost in South Africa?

In May 2024, the upfront cost of installing a solar power system in South Africa would set you back approximately R150,000 to R350,000 for a small project and up to R3.5 million for a 100kW system.

What financing options are available for energy systems?

As the market has grown, innovative funding solutions have developed. Here are seven financing options for the residential, commercial and industrial sectors to consider: PPAs are a popular choice among intensive energy users since the service provider fully covers the system's pre-site preparation, installation, and long-term O&M.

Why should you choose a modular energy storage container?

Advanced monitoring systems and IoT integration ensure optimal performance and remote management capabilities. The modular design allows for easy expansion, with the option to expand the battery storage system by 100 - 500kwh, making our energy storage container perfect for meeting growing energy demands.

How long does it take to ship a solar container?

Standard solar container models can be manufactured and ready to ship in as little as 4-6 weeks. Customized configurations can take up to 8-10 weeks, with shipping times varying by destination. Do you offer after-sales support for mobile solar PV containers?
