# **Germany Hamburg promotes new energy storage**

## Overview

---

Why does Germany need a battery storage system?

As the share of renewable energy in the power grid continues to grow, so does the need for efficient electricity storage. In 2024, battery storage systems in Germany grew by approximately 50 percent compared to the previous year.

How did battery storage grow in Germany in 2024?

In 2024, battery storage systems in Germany grew by approximately 50 percent compared to the previous year. In 2024, the number, output, and storage capacity of battery systems in Germany grew by around 50% compared to the previous year. At the beginning of January 2025, Germany reported a total of 18.2 GWh in stationary battery storage systems.

Where is Germany's largest battery storage system located?

In March 2025, Germany's largest battery storage system – located in Bollingstedt, Schleswig-Holstein – was connected to the grid. It delivers 103.5 megawatts of power and has an energy capacity of 238 megawatt-hours. The expansion of electricity storage is a key component of Germany's energy transition.

How much power does Germany have in a battery storage system?

At the beginning of January 2025, Germany reported a total of 18.2 GWh in stationary battery storage systems. Of this, 15.8 GWh came from home storage systems, 2.8 GWh from utility-scale storage, and 775 MWh from commercial storage.

## Germany Hamburg promotes new energy storage

### Port of Hamburg uses green 'smart batteries' to support the German

Driverless container transporters operating in the port of Hamburg, Germany, at the HHLA Container Terminal Altenwerder, are being run on lithium-ion batteries instead of diesel. The ...
