

Hanoi Metro Station Uses High-Efficiency Photovoltaic Folding Containers

Overview

What is the Hanoi Metro project?

The metro project is part of the Vietnam Ministry of Transport's master plan, which aims to reduce the use of private transport and enhance the urban environment. The feasibility study for a Hanoi metro pilot route / line was completed in October 2005.

When will the Hanoi Metro Line be completed?

But the journey doesn't stop there. The underground section, which will extend the line by four more stations, kicked off its construction on 30th July 2024. Once completed, this will connect directly to Hanoi Railway Station, integrating the metro line seamlessly into the city's transport network.

What is a mobile solar PV container?

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and commercial applications. Fast deployment in all climates.

What is Hanoi Metro Line 3?

The ultimate goal of Hanoi Metro Line 3 is to alleviate the city's chronic traffic congestion and provide a cleaner, greener transportation alternative. Once fully operational, the metro line is expected to carry up to 90 million passengers annually, boosting the use of public transport from 15% to an ambitious 40%.
