# Home DC Solar System

## Overview

---

### What is a DC Solar System?

A DC solar system is the simplest type of solar system. It's best suited to the most basic energy needs, such as for a one-bedroom cabin or RV. Since the DC solar system doesn't rely on a battery or an inverter, you'll only have electricity on sunny days; there's no stored energy with this type of system.

### What is a home solar system?

A home solar system is a powerful, eco-friendly solution designed to harness the sun's abundant energy, converting it into electricity for your household. This innovative system typically consists of solar panels installed on your roof, an inverter to transform the sunlight into usable power, and batteries for energy storage.

### Is a home Solar System a green choice in 2024?

In 2024, harnessing the sun's energy with a home solar system is not just a green choice; it's a smart, cost-effective decision for energy independence. This comprehensive guide demystifies home solar systems, covering what they are, their importance, how they work, the different types available, and crucially, the amount of capital involved.

### Who is fusion solar?

Look no further than FusionSolar, the leading name in innovative home solar system solutions. With a robust lineup tailored to meet the unique energy needs of South African homes, we offer state-of-the-art technology that blends efficiency with environmental stewardship.
