Home corridor solar lights

Overview

What is the Solar Corridor system?

The Solar Corridor system is an agronomic approach that increases crop yields by using wide row spacings to allow more light to penetrate the lower areas of the canopy and increase photosynthesis per unit ground area (Kremer and Deichman, 2014).

What is the Light Corridor House?

The Light Corridor House is an extension that celebrates the journey through the old to the new. Upon arrival, it presents itself as a familiar Victorian worker's cottage.

What are solar path lights?

Solar Path lights can help guests comfortably make their way to your door or backyard. These LED exterior solar lamps come in unique designs and finishes including brushed, antique, matte and gloss, elevating the look of your garden or yard. Light doorways and gates with solar powered lanterns.

Do solar outdoor lights work at night?

Some even come with a dusk-to-dawn feature, ensuring that your solar outdoor lights remain off during the day to save energy but are activated at night. Lowe's also carries outdoor solar light versions of patio lights, step lights, rail lights and string lights so you can brighten all your outdoor areas with the help of the sun.
