

# **How much does 5 kilowatts of solar energy cost**

## Overview

---

How much does a 5 kW solar system cost?

For a fully installed 5 kW Solar System in 2025, typical cost lands near \$2.50-\$3.50 per watt, or \$12,500-\$17,500 before incentives.

How much does a 10kW Solar System cost?

In the USA, a 10kW solar system typically costs between \$20,000 and \$28,000 before the federal tax credit. After applying the 30% ITC, the net cost drops to \$14,000-\$19,600. The 10kW solar installation cost for homes and businesses is a step up in budget, but it also offers a much larger impact on energy bills and carbon footprint.

Should you buy a 5kw or 10kW Solar System?

Given rising electricity costs, the 5kW solar system price with subsidy in both countries offers a smart long-term investment for households. A 10kW solar system is ideal for larger homes, multi-storey bungalows, and even small businesses such as clinics, retail stores, and guest houses.

How much electricity does a 5 kW solar system generate?

A 5 kW solar panel system generates approximately 7,260 kWh of electricity each year. That's enough to keep 132 TVs running, power 5 refrigerators, or meet the energy needs of a small household (the average U.S. shopper on EnergySage needs about 12 kW of solar).
