# How much does a 2 kilowatt solar energy system cost

## Overview

---

How much does a 2KW Solar System cost?

The typical cost for a 2kW solar system is around \$4,000. It is important to highlight that solar panel prices have significantly decreased over the past 10 years, making renewable energy more accessible and affordable for homeowners and businesses. Source: The National Renewable Energy Laboratory (NREL).

Can a 2KW solar system save you money?

Investing in a 2kW solar system can lead to significant savings on electricity bills. On average, this system can save up to \$621 per year. Over the 25-year lifetime of the solar panels, the total savings can amount to \$15,513. It is important to consider the rising cost of electricity when evaluating the potential savings of a 2kW solar system.

What is the relative cost of solar energy?

Another measure of the relative cost of solar energy is its price per kilowatt-hour (kWh). Whereas the price per watt considers the solar system's size, the price per kWh shows the price of the solar system per unit of energy it produces over a given period of time. Net cost of the system / lifetime output = cost per kilowatt hour.

How much electricity does a 2 kW solar system use?

The cost of electricity where you live is the most significant determinant of your solar savings. The table below shows average estimated electricity production numbers for 2 kW solar energy systems in cities across the U.S. By comparison, the average household in the U.S. uses 893 kilowatt-hours (kWh) a month, which equals 10,715 kWh per year.
