

How much does a 20 000-watt solar panel cost

Overview

How much does a 20 kW solar system cost?

A 20 kW solar panel system is enough to power a large home—but it'll cost you about \$55,000. Why trust EnergySage?

Installing a solar panel system can save you tens of thousands of dollars over time, but the upfront costs aren't exactly chump change.

How much does a solar panel system cost?

Installing a solar panel system can save you tens of thousands of dollars over time, but the upfront costs aren't exactly chump change. In 2024, the average cost for a 20 kilowatt (kW) solar panel system hovers around \$55,000 before incentives, though actual prices vary depending on your location and installation specifics.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.

How much electricity does a 20 kW solar system produce?

A 20 kW solar panel system produces about 29,033 kWh of electricity annually, but the exact amount depends on where you live and how much sun you get. DIYing a 20 kW solar panel system usually isn't your best bet: You're much better off hiring a professional solar company for optimal results. How much does a 20 kW solar system cost?
