

# **How much does a storage battery cost in Mumbai India**

## Overview

---

How much does battery-based energy storage cost in India?

Currently, the cost of battery-based energy storage in India is INR 10.18/kWh, as discovered in a SECI auction for 500 MW/1000 MWh BESS. The government has launched viability gap funding and Production-Linked Incentive (PLI) schemes to make battery storage affordable.

How much does a battery cost in India?

While some sources mention wholesale battery pack prices around \$55–60 per kWh for large utility projects, the reality for home users is quite different. Based on current market data from major retailers, real residential battery costs in India are around ₹30,000 per kWh for quality lithium-ion batteries.

What is the future of solar battery storage in India?

The solar battery storage market in India is expected to develop rapidly by 2025 due to lowering prices, strong government backing, and rising energy security demands. As the country moves toward its ambitious goal of 500 GW of green energy by 2030, the market is expected to hit \$10 billion annually.

Is battery storage a bankable asset in India?

Battery storage in India has moved from a promising technology to a fully bankable grid asset. A significant drop in battery costs and widening wholesale-price spreads mean a well-operated system can cover its expenses and still deliver attractive profits.
