How much does it cost to install solar panels on London roofs

Overview

How much do solar panels cost in the UK?

The most common type of system is the 4kW solar system, which costs between £5,000 – £6,000. It can save the average household about £660 per year, provided that they have a decent number of sunlight hours and are installed on a south-facing roof. In 2025, the price of solar panels in the UK can vary depending on several factors.

How much does it cost to install a solar panel?

In general, labour costs will make up 25-30% of your total installation costs. The most common way to calculate the labour costs of a solar panel installation is to charge 20p per watt. So, for a 4kW system, you would pay 20p for 4000 watts, which comes to £800. Several factors can impact labour costs, including:.

How long does it take to install solar panels?

This covers the physical installation, wiring, and system setup. Labour costs vary based on system size and complexity—larger systems or tricky rooftops will cost more. Solar panel installation usually takes one to two days, but larger installations – over 14 panels – can take up to four days.

How much does a 0% VAT Solar System cost?

0% VAT scheme can save between £1,000 - £3,000 on installation costs. In 2023, installing a 4kW solar panel system would set you back at least £8,000. Fast forward to today, October 2025, and that price has dropped closer to £6,600— resulting in a 17% dip since May 2023.
