# How much electricity can solar panels generate in Muscat

## Overview

---

How much energy does a solar PV system produce in Muscat?

Average 5.24kWh/day in Winter. Average 7.37kWh/day in Spring. To maximize your solar PV system's energy output in Muscat, Oman (Lat/Long 23.578, 58.4021) throughout the year, you should tilt your panels at an angle of 21° South for fixed panel installations.

Is solar power possible in Muscat Oman?

In the city of Muscat, Oman, located at latitude 23.578 and longitude 58.4021, solar power generation is highly feasible due to favorable conditions throughout the year.

How should solar panels be positioned in Muscat Oman?

In Autumn, tilt panels to 29° facing South for maximum generation. During Winter, adjust your solar panels to a 39° angle towards the South for optimal energy production. Lastly, in Spring, position your panels at a 17° angle facing South to capture the most solar energy in Muscat, Oman.

How much solar power does Oman produce a year?

Seasonal solar PV output for Latitude: 23.578, Longitude: 58.4021 (Muscat, Oman), based on our analysis of 8760 hourly intervals of solar and meteorological data (one whole year) retrieved for that set of coordinates/location from NASA POWER (The Prediction of Worldwide Energy Resources) API: Average 7.36kWh/day in Summer.
