How much is the price of Chisinau outdoor wind power base station

Overview

How much does a wind turbine cost in 2024?

In 2024, the average capital cost for onshore turbines ranges between \$900 and \$1,200 per kilowatt (kW), while offshore turbines can cost between \$2,000 and \$3,000 per kW due to their complexity and installation challenges. Installation costs are influenced by site-specific conditions such as terrain, grid connection, and logistical considerations.

How much does a commercial wind turbine cost?

How much do commercial wind turbines cost?

A utility-scale wind turbine costs between \$1.3 million to \$2.2 million per MW of installed nameplate capacity. Most commercial-scale turbines installed nowadays are 2 MW in capacity and cost between \$3 and \$4 million to install.

How much does an offshore wind turbine cost?

Large offshore turbines can cost tens of millions of dollars, with the most powerful 12 MW turbines reaching up to \$400 million for manufacturing and installation. Lastly, Statista reports that the global average installed cost for onshore wind power was approximately \$1,160 per kilowatt in 2023.

How much does a community-scale wind turbine cost?

Moving up to larger 250 kW community-scale wind turbines suited for powering schools, farms, businesses and small neighborhoods, costs scale to approximately \$500,000 to \$750,000 each when factoring in installation.
