

How to connect the power supply to the indoor base station

Overview

Should you set up a home base station?

Setting up a home base station for your CB radio can provide several benefits. You can stay connected with friends and family, monitor emergency channels, and be better prepared for any situation. While it might seem daunting, setting up a CB base station is actually a simple and straightforward process.

How do I set up a base station?

Set up the base station using either the tripod or T-bar mounting method. You must use an external radio antenna kit for the internal 450 MHz or 900 MHz radio. To avoid interference between the 900 MHz radio and GPRS transmissions, do not mount the external radio antenna within 1 m (3.3 ft) of the GSM antenna.

How much power does a base station have?

Maximum base station power is limited to 38 dBm output power for Medium-Range base stations, 24 dBm output power for Local Area base stations, and to 20 dBm for Home base stations. This power is defined per antenna and carrier, except for home base stations, where the power over all antennas (up to four) is counted.

How do I set up a base station (fixed location) CB?

When setting up a base station (fixed location) CB, you have two basic choices of CBs: Base Station CB – A base station CB is a table-top model with a built-in power supply. Has a built-in power supply. Just plug it into an outlet. Usually feature-rich with plenty of cool knobs and switches. Easy to access the controls.
