

India s first solar energy storage base station

Overview

Is India's largest battery energy storage system powered by solar energy?

In February, the Solar Energy Corporation of India (SECI) commissioned India's largest Battery Energy Storage System (BESS), powered by solar energy.

Where is India's first large scale battery energy storage facility located?

This led to the establishment of India's first large scale battery energy storage (BESS) facility set up alongside a 100-megawatt (MW) solar power plant in Rajnandgaon, in India's eastern state of Chhattisgarh.

When will India launch its first battery energy storage system?

India is set to launch its first commercial utility-scale Battery Energy Storage System (BESS) in Delhi, expected to go live by March this year. India is set to launch its first commercial utility-scale Battery Energy Storage System (BESS) in Delhi, expected to go live by March this year.

Will Madhya Pradesh build its first solar power storage facility?

Madhya Pradesh's new solar storage plant seeks to deliver continuous power, expanding India's renewable energy landscape with low-cost nighttime electricity. India is on pace to build its first solar power storage facility in Morena, Madhya Pradesh. Construction is set to begin in 2025, with the facility scheduled to be operational by 2027.
