

# **Insulation board and price for solar panels**

## Overview

---

How much do insulation boards cost?

The cost of insulation boards will especially depend on the type of insulation panel you choose. In general, EPS boards are the cheapest insulation boards: you will pay about £10 per square metre. PIR boards cost about £5 - £15 per square metre. XPS insulation panels have a price of 10 to 15 pounds per square metre, depending on the thickness.

What is solar energy insulation?

By avoiding thermal losses through the rear and the sides of the collector, solar energy insulation optimizes the efficiency of the collector, enabling the maximum amount of collected heat to be transferred to the circulating fluid. ISOVER has developed a unique range of products designed specifically for solar applications.

How much do insulation panels cost?

Insulation panels, such as R1.5 polyester batts, typically cost around \$35 on average, while R4.0 polyester batts can cost approximately \$75. Foilboard panels' cost ranges from \$22-26 based on their size and R-value.

Why is solar energy insulation important?

Solar energy insulation helps save and concentrate heat energy. By avoiding thermal losses through the rear and the sides of the collector, solar energy insulation optimizes the efficiency of the collector, enabling the maximum amount of collected heat to be transferred to the circulating fluid.
