

# Irish power generation equipment container

## Overview

---

Is the Irish power generation market receptive to US technology?

The \$2.6 billion Irish market for electrical power generation equipment is very receptive to U.S. technology. In the face of strong international competition, U.S. companies have achieved success in supplying technology, equipment, and systems to Irish power generation operators.

How much energy do data centers need in Ireland?

In 2021, over 1,700 MVA of demand capacity is contracted to the 70 data centers and other large energy users based in Ireland. Demand from data centers and other new large energy users is forecast to account for 28% of all energy demand by 2031.

Will Shannon LNG build a 600 MW regasification plant?

Developer Shannon LNG has obtained permission from the Irish planning authorities for a 600 MW regasification unit and a 120 MW battery energy storage system (BESS) in County Kerry. It is unclear when the plant will be built.

How will artificial intelligence impact Ireland's energy industry?

The deployment of emerging leading-edge solutions utilizing artificial intelligence are expected to play an expanded role forward. Ireland's largest energy company, ESB, has ongoing investment plans for upgrading its power generation assets, transmission, and distribution networks through 2027.
