

# **Irish solar container outdoor power export tariff**

## Overview

---

What is Ireland's clean export guarantee (CEG) tariff?

This page will help you find out everything you need to know about Ireland's Clean Export Guarantee (CEG) Tariff and selling electricity to the grid. All utility companies are required to pay homeowners for any surplus energy sent back to the grid from their home solar PV system.

Can you sell solar energy in Ireland?

You can only sell solar energy to the electricity supplier with which you are currently under contract. If you have solar panels, you should also consider their export price when you are choosing an electricity plan. How to get paid for excess solar electricity in Ireland?

It is a simple process to get paid for solar energy exports.

Why should Irish businesses export solar energy?

Solar export is more than just a technical process - it's a strategic advantage for Irish businesses. In short, solar energy export can deliver both financial returns and competitive advantage. Cost reduction: By producing your own renewable power, you cut reliance on grid electricity and reduce monthly bills.

How will Ireland's feed-in tariff scheme impact solar adoption in 2025?

Ireland's feed-in tariff scheme has matured into a powerful incentive for solar adoption. In 2025, homeowners are well-positioned to benefit—reducing their carbon footprint and energy costs while earning income from solar exports. If you're ready to start generating your own power and earning from it, WattCharger is here to help.
