

Large Energy Storage Vehicle Sales

Overview

Can new energy vehicles be used as mobile energy storage units?

New energy vehicles can also serve as mobile energy storage units, by interacting with the power grid through charging and discharging, a model known as V2G (Vehicle-to-Grid). V2G can improve the overall efficiency and stability of the power grid through peak-shaving and valley filling and its emergency response capability.

Why is Tesla building a large-scale energy storage facility in China?

Their growing use helps stabilize power grids, prevent outages, and reduce reliance on fossil fuels. This project is Tesla's first large-scale energy storage installation in China, complementing its existing automotive manufacturing presence in the city through Giga Shanghai.

Will Tesla build a grid-scale battery energy storage station in China?

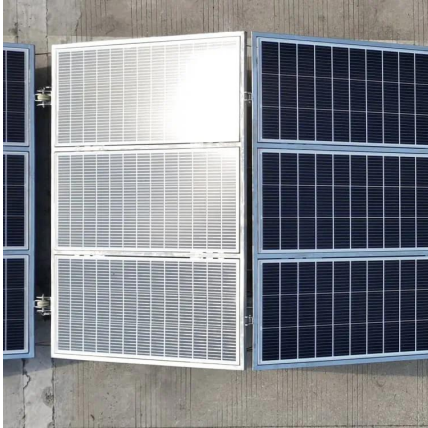

Tesla has officially signed a ¥4 billion (C\$764/US\$557 million) deal to build its first grid-scale battery energy storage station in China, leveraging its Megapack technology.

How many new energy vehicles were sold in China in 2023?

In 2023, the sales volume of new energy vehicles (NEVs) in China reached 9.495 million units, a y-o-y increase of 37.9%.
