

# **Large-scale single-unit power generation side energy storage**

## Overview

---

What is the largest grid-forming energy storage station in China?

This marks the completion and operation of the largest grid-forming energy storage station in China. The photo shows the energy storage station supporting the Ningdong Composite Photovoltaic Base Project. This energy storage station is one of the first batch of projects supporting the 100 GW large-scale wind and photovoltaic bases nationwide.

What is Ningxia power's energy storage station?

On March 31, the second phase of the 100 MW/200 MWh energy storage station, a supporting project of the Ningxia Power's East Ningxia Composite Photovoltaic Base Project under CHN Energy, was successfully connected to the grid. This marks the completion and operation of the largest grid-forming energy storage station in China.

What is the scope of energy storage in the PRC?

“[https://www.gov.cn/jingji/2023/01/03/content\\_1881111.htm](https://www.gov.cn/jingji/2023/01/03/content_1881111.htm),” People's Government of the PRC, 3 Jan 2023, at [https://](https://www.gov.cn/jingji/2023/01/03/content_1881111.htm) The scope includes two categories: dispatch-controlled new type energy storage and self-used new type energy storage by power stations.

What will be done to support grid-forming energy storage?

Going forward, various tests and performance experiments will be carried out to provide data support for the testing and standard setting of grid-forming energy storage.
