

# **Lithium-ion battery energy storage container price in Israel**

## Overview

---

How much does a battery cost in Israel?

Israel's storage tender sets prices between \$0.0056 and \$0.0085 per kW, with kWh figures therefore at \$49.41 to \$74.20 per kWh. From ESS News Israel has awarded contracts for 1.5 GW of high-voltage battery storage capacity across three regions, marking a significant milestone in the country's energy transition.

What is the containerized lithium battery energy storage system?

The containerized lithium battery energy storage system is based on a 40-foot standard container, and the lithium iron phosphate battery system, PCS, BMS, EMS, air conditioning system, fire protection system, power distribution system, etc. are gathered in a special box to achieve high integration.

What does IEA's energy auction mean for Israel?

The auction, managed by the Israeli Electricity Authority (IEA), will facilitate the deployment of large-scale energy storage systems designed to integrate more renewable energy into the grid. With total investments estimated at ILS 3 billion (~\$840 million), the projects are expected to commence operations in 2027.

## Lithium-ion battery energy storage container price in Israel
