

GETON CONTAINERS

Muscat Super Lithium Ion Capacitor Series

Overview

What are Musashi energy solutions' lithium-ion capacitor cells?

Musashi Energy Solutions' lithium-ion capacitor cells are energy storage devices with high energy density and output density, and can charge and discharge large currents. While ensuring high safety, it has features such as high repetitive charge / discharge characteristics, small self-discharge, and a wide operating temperature range.

What is hybrid super capacitor (HSC)?

Hybrid Super Capacitor (HSC) is a new electric storage device that combines high power density and high energy density. Compared to similar electricity storage devices, electrical double layer capacitor (EDLC) and lithium ion battery (LIB), we introduce its characteristics. What is a Hybrid Super Capacitor (HSC)?

Why did Musashi develop a hybrid capacitor?

Musashi's adoption of the world's first prismatic design for a hybrid capacitor has resulted in exceptional durability and much higher heat dissipation efficiency than ordinary cylindrical types.

What is a hybrid supercapacitor cell?

Our Hybrid SuperCapacitor cells combine the power density, high cycle capabilities and long life of electric double-layer capacitors (EDLC) construction with higher energy density approaching that of lithium-ion battery (LIB) technology. This without the safety concerns of a thermal runaway event of LIBs. Get Ready for Next-Level Power Density!

Muscat Super Lithium Ion Capacitor Series

[Front runner of Hybrid Super Capacitor|Musashi Energy ...](#)

Musashi Energy Solutions develops, manufactures, and sells hybrid super capacitors (HSCs), which are attracting attention for the realization of a carbon-neutral society. ...
