Namibia's PV and energy storage policy plan

Overview

What are the key policies and initiatives guiding Namib-IA's renewables sector?

There have been five key policies and initiatives guiding the trajectory of Namib-ia's renewables sector. These are the White Paper on Energy Policy (1998), the Renewable Energy Feed-In Tariff (REFiT) Programme (2011), the National Renewable Energy Policy (2017) and the Namibia Green Hydrogen and Derivatives Strategy (2022).

How many solar PV plants are there in Namibia?

In 2018, the first twin solar PV plants in Namibia were opened in Gobabis in the Omaheke region. Ejuva One and Ejuva Two solar PV each have an installed capacity of 5 MW5. They have the capacity to feed 25.8 GWh into NamPower's grid each year.

How can Namibia develop a sustainable sector?

It sought to develop a sustainable sector through the state promotion of renewable energies. The white paper notably highlights hydropower, solar and wind energy as renewable sources that could enable Namibia's economic growth alongside environmental sustainability.

What is Namibia's First Solar power plant?

Namibia's first solar power plant was inaugurated in 2015 through the REFiT system. InnoSun Energy Holdings opened the Omburu Solar PV Park in May with an installed capacity of 4.5 MW, generating 13,500,000 kWh a year. The Park covers 40 hectares and contains more than 33,000 panels.
