

New Delhi BESS portable power supply manufacturer

Overview

What are battery energy storage systems (Bess)?

Battery Energy Storage Systems (BESS) are at the heart of India's renewable energy drive, helping to address the issue of intermittent power from solar and wind energy. With the Indian government targeting 500 GW of renewable energy capacity by 2030, energy storage has become essential for grid stabilization and reliable power delivery.

What does Bess stand for?

AmpereHour Energy, a comprehensive energy storage solutions provider, in collaboration with Indigrid, has commissioned a 20 MW/40 MWh standalone battery energy storage system (BESS) for BSES Rajdhani Power Ltd (BRPL) at the Kilokari Substation in Delhi.

Why should India invest in a Bess storage facility?

With a significant increase in renewable energy generation capacity, it is imperative that storage facilities are developed to help India and the world transition to clean energy. With an annual tariff nearly 55% lower than the previous benchmark, the project sets a new standard for BESS affordability in India.

Why does the Bess Consortium support large-scale storage deployment?

"The BESS Consortium's support for large-scale storage deployment reflects the growing recognition that universal access to renewable energy and the energy transitions of emerging markets must be fast, inclusive, and resilient.
