

New Energy Base Station Wind Power Construction and Installation

Overview

What is CHN energy's wind power base project?

On April 26th, CHN Energy's 2.5 GW Wind Power Base Project in Ningxia Tengger "Desert, Gobi, and Barren Land" area, covering Guyuan City, Hongsibao District of Wuzhong City and Haiyuan County, was approved and is about to enter the construction phase.

How many kW of solar power will be installed at the base?

The clean energy projects at the base are planned to have an installed capacity of 6 million kW, which includes 4.5 million kW of wind power and 1.5 million kW of solar power. Construction of the supporting energy storage facilities is also included.

What is China's first GW-level wind power project?

This is the first wind power project in China's largest "Desert, Gobi, and Barren Land" Energy Base. The total investment of the wind power project is approximately 12 billion yuan. It is the first GW-level wind power project in the Ningxia Tengger "Desert, Gobi, and Barren Land" Energy Base. Its construction is expected to start within the year.

How will China's new power base work?

All projects at the base are scheduled to be put into operation within China's 14th Five-Year Plan (2021-25) period. Once operational, the base is expected to export 24 billion kWh of power annually to East China's Shandong Province through the ultra-high-voltage power transmission line.
