

New Energy Battery Cabinet Production Plant

Overview

What is China's new energy storage plant?

Located in Shanghai's Lingang Free Trade Zone, the plant aims to bolster global energy storage capacity by producing 10,000 Megapacks annually, equivalent to 40 GWh of energy storage. These lithium-ion battery units are designed for large-scale commercial and utility projects, helping stabilize power grids and support renewable energy integration.

What is Tesla's new energy storage plant in China?

The facility, first announced in April 2023, marks Tesla's continued expansion in China, the world's largest electric vehicle and energy storage market. Located in Shanghai's Lingang Free Trade Zone, the plant aims to bolster global energy storage capacity by producing 10,000 Megapacks annually, equivalent to 40 GWh of energy storage.

How big is the energy storage factory?

The energy storage factory covers an area of approximately 200,000 square meters, which is equivalent to the size of 30 standard soccer fields. It initially plans to produce 10,000 Megapack units a year, with a storage capacity of nearly 40 GWh.

Is China ready for a new energy industry?

Lauding China's efforts to develop the new energy industry, including the energy storage sector, Tesla vice president Tao Lin told Xinhua in May last year that the country offers a complete industrial chain, vast market potential, and a production and business environment crucial for enterprise growth.

New Energy Battery Cabinet Production Plant

[Tesla battery Megafactory in Shanghai launches production](#)

Tesla's energy storage plant in Shanghai's Ling-gang Special Area commenced operation on Feb 11, as the assembly line started the production of the first Megapack unit. ...
