

**GETON CONTAINERS**

# **New sodium battery solar container energy storage system**

## Overview

---

What is the largest sodium ion battery storage system in the world?

This project opened on June 30, 2024, with battery cells supplied by Zhongke Haina, making it the largest sodium-ion battery energy storage system in the world. The storage system consists of 42 battery containers and 21 integrated booster and conversion machines, in addition to a 110 kV booster station.

What is Datang Hubei sodium ion new energy storage power station?

The project represents the first phase of the Datang Hubei Sodium Ion New Energy Storage Power Station, which consists of 42 battery energy storage containers and 21 sets of boost converters. It uses 185 ampere-hour large-capacity sodium-ion batteries supplied by China's HiNa Battery Technology and is equipped with a 110 kV transformer station.

Are sodium batteries a good choice for stationary energy storage systems?

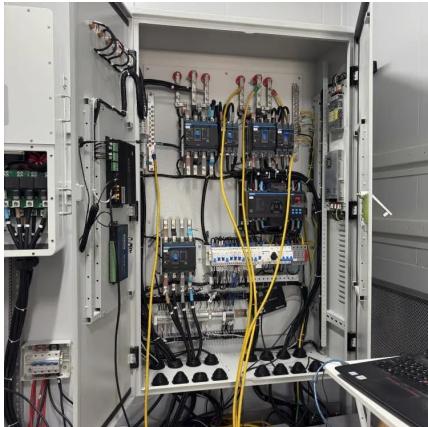

However, for stationary energy storage systems, such as those used to store energy from solar and wind power, sodium batteries are highly competitive due to their lower cost and better performance in large-scale deployments.

Are sodium-ion batteries sustainable?

The future of sodium-ion batteries holds immense potential as a sustainable and cost-effective alternative to traditional lithium-ion batteries by addressing critical challenges in energy storage, scarcity of lithium, and sustainability.
