

# **New solar container battery lithium iron phosphate**

## Overview

---

What is Delta's next-generation containerized battery system?

Delta, a global leader in power and energy management, presents the next-generation containerized battery system that is tailored for MW-level solar-plus-storage, ancillary services, and microgrid projects.

How much does a LiFePO<sub>4</sub> battery weigh?

The company says its newest product uses 700-Ah lithium iron phosphate (LiFePO<sub>4</sub>) cells in a liquid-cooled 1,500 to 2,000-volt configuration that's good for nearly 16,000 charge cycles that all fits in half a normal shipping container. All in, the system weighs about 55 tons (50 tonnes).

Are LiFePO<sub>4</sub> batteries safe?

While LiFePO<sub>4</sub> doesn't have the same inherent risks of "venting" as do the much more common lithium-ion (Li-ion) batteries, Envision's energy storage unit features a pretty robust six-tiered suite of safety features.

Will Envision Energy's 8 MWh battery fit in a 20 ft 6 m shipping container?

Envision Energy announced an 8-MWh, grid-scale battery that fits in a 20-ft (6-m) shipping container this week while at the third Electrical Energy Storage Alliance (EESA) exhibition held in Shanghai. Taken from Envision Energy's website, this is a possible design configuration of its 8-MWh, 20-ft (6-m) container battery. It's colossal.
