

# North Korea container generator manufacturer

## Overview

---

What is Hyosung emergency power generator?

is leading the global market for key products for industrial equipment. Hyosung emergency power generators are supplied to regions without access to electricity or where high-quality power is required in emergency situations. Our primary goal is to deliver customer-specific solutions those are highly reliable and productive.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.

What is a Tier 4 containerized generator?

Our Tier 4 containerized generators are high-powered —500 kW to 1250 kW— units packaged in 30-foot or 48-foot ISO containers.

What is a dual pack generator?

Simply put, dual packs are two parallel generators in one ISO container: Two 500 kW generators could be paralleled to achieve a 1000 kW output, or two 625 kW generators to achieve 1250 kW. This dual configuration increases the longevity of the overall unit by preventing the effects of light loading.
